

HOME _____ DATE CHECKED _____

This checklist is for one storage location. If kratom is kept in more than one place in your home, use a sheet for each. Fill it in standing at the location rather than from memory, and check a box only when you have actually looked. A box you can't check is the useful part of the sheet, because it shows you what to change. Tape the finished sheet inside the cabinet door if that helps, and fill in a new one whenever the household changes.
